

Once you have bought your music track, the download link will be sent to your email.

Click on the link in your email, and open in the browser of your choice. Download the file to your “files”. This should be an app that is automatically on your device, but if it isn’t you can download the Apple “Files” app in the App Store.

Once you have downloaded the app, you will be able to see all of the files that you have downloaded.
